Put Swap on your phone

A one-time setup. Afterwards you tap a small icon, like any app.

Before you start: you should have a text message from the club with a long link that begins with **https://**. Keep that text open.

iPhone

1. **Tap the link** in the text message. It opens in **Safari** (the blue compass icon). If it asks which app to use, choose **Safari**.
2. **Wait for the page to load.** You should see **Swap Admin** at the top and **“What do you want to do?”**
3. **Find the Share button**: a small square with an arrow pointing up, at the bottom middle of the screen. If you don’t see it, tap the **three dots (•••)** at the bottom right and look for **Share**. If the bottom bar is hidden, scroll the page up a little and it comes back.
4. **Tap Share.** A menu slides up from the bottom.
5. **Scroll down in that menu** until you see **Add to Home Screen** (a small plus sign in a square). If you don’t see it, scroll further or tap **More**.
6. **Tap Add to Home Screen.**
7. A name box appears. **Leave the name as “Swap”.** If you see a switch called **Open as Web App**, leave it turned **on** (green).
8. **Tap Add** in the top right corner.
9. **Close Safari** and go to your home screen. You’ll see a new blue square with two arrows (one white, one green). That’s Swap. You may need to swipe to the last page of your home screen to find it.

Android phone

1. Tap the link in the text message. It opens in **Chrome**.
2. Tap the **three dots** (stacked one above the other) at the top right.
3. Tap **Add to Home screen** (it may say **Install app**).
4. Tap **Add** (or **Install**). The Swap icon now appears on your home screen.

Check that it worked

Tap the new icon. You should see the Swap screen, with **Swap Admin** at the top and no Safari or Chrome bars around it.

If you see the club's regular schedule page instead, the icon was made the wrong way. Delete it (press and hold the icon, then tap **Remove App** on iPhone, or **Remove** on Android) and start again from step 1. **Always start by tapping the link in your text message.**

How to use Swap

1. Tap the **Swap** icon.
2. Type the name of the player who can't play, and tap their name.
3. Tap the date of the game they can't play. You can also type the date, for example **3/10**.
4. You'll see players who could trade games or take the game. Tap **Swap** to trade, or **Give game** to hand it over.
5. When it asks you to confirm, tap **OK**. Then tap **Notify players** to text the people involved.

Please remember

• The link in your text is **private and belongs only to you**. Please don't forward it or post it anywhere. Anyone who has it can change games.

• **If you lose your phone or delete the icon**, tap the original link in your text again and repeat the steps above. If the link says "not valid", ask the club for a new one.

• **If something doesn't look right**, send a screenshot to the club.
